## Sizing Guide RINGS

Welcome, discover the perfect size with us!

### **1** With a rope or ribbon

- Wrap a string or ribbon around the base of your finger, also consider your knuckle, the ideal measurement should slide comfortably on your finger from the knuckle to the base of it.
- With a pen, mark the point where the two ends meet.
- Measure the resulting chord in millimeters.
- To identify your size, select the closest one based on the following table.

### TIPS

- The size of your finger changes according to the time of day and the weather; to get the most accurate size, measure your finger at different times of the day and on different days to compare.
- Avoid measuring your fingers when they are cold or wet, because they will be smaller.
- Remember to take the specific measurement of the finger on which you will use the ring, because the measurements vary in each hand.

## Sizing Guide - Rings

### 2 With another ring

- Place the ring on top of a ruler, as in the photo below. Make sure to place the ring on the ruler in the same position as the example in the photo, right in the center, and count the millimeters.

- Next, check the table of equivalences.
